Transport Group

Realising the potential contribution IT can make to transport systems

Charter

About Intellect

Intellect is the trade association for the UK technology industry. Intellect provides a collective voice for its members and drives connections with government and business to create a commercial environment in which they can thrive. Intellect represents over 750 companies ranging from SMEs to multinationals. As the hub for this community, Intellect is able to draw upon a wealth of experience and expertise to ensure that its members are best placed to tackle challenges now and in the future.

Who are we?

Intellect's Transport Group represents the views of member companies involved in the transport arena. The group seeks to inform transport stakeholders of the potential contribution IT can make to transport systems, and optimise the trading environment in which our members operate.

Our activities focus on building the relationship between the technology industry and the customers for transport services. We act as a lobbying body and a focus for debate about the actions and directions of government departments, agencies and other significant stakeholders.

The group has a programme of regular briefings throughout the year from key opinion formers and decision makers across the transport arena. These include representatives at senior executive level from all principal stakeholders - government ministers, the Department for Transport, Transport for London and other notable bodies closely associated with shaping this market in the future. www.intellectuk.org/transport

Past speakers include:

- ▶ **Steve Gooding**, Director, Department for Transport
- ▶ **Prof Brian Collins**, Chief Scientific Advisor, Department for Transport
- ▶ **Roger Evans**, Chair of the London Assembly Transport Committee
- ▶ **Paul Smith**, London Stakeholder Management, Marketing and Communications Association of Train Operating Companies (ATOC)
- ▶ **David Bott**, DTI Intelligent Transport Systems and Services (ITSS Innovation Platform)
- ▶ **Matthew White**, Chief Scientific Advisors Unit, Department for Transport
- ▶ **Robin Shaw**, Transport Director, National Assembly of Wales
- ▶ **Graham Bodman**, Business Development Manager UK Transport, Atos Origin
- ▶ **Justin Caton**, Development Engineer HSBC Rail (UK) Ltd
- ▶ **Professor Eric Sampson CBE**, Visiting Professor at the University of Newcastle and ITS UK Chairman
- ▶ **Peter Ivey**, Director, Innotec
- ▶ **Professor Chris Lines**, Head of London Road Safety Unit, Transport for London

Our aims and objectives

- ▶ Promote the UK IT Transport Industry to key stakeholders - including ministers, officials, politicians and other opinion formers - with a view to informing and influencing policy.
- ▶ Publicise the importance of technology in all related areas of transport eg environment, security, safety.
- ▶ Identify the opportunities and barriers to market entry.
- ▶ Examine key technology issues (eg interoperability, international standards, road pricing).
- ▶ Examine the latest developments concerning products, business models and channels, market trends, future growth models and other relevant issues.
- ▶ Encourage and develop the application of Concept Viability for new procurements.
- ▶ Promote knowledge sharing and networking.
- ▶ Assist the development of Intellect guidance documents.

Current issues

The Department for Transport has set out its strategic objectives for the coming years. Aligning the group's work with the objectives enables us to effectively engage with government and add value to the future development of transport:

- ▶ maximising overall competitiveness and productivity of the economy
- ▶ reducing transport's emissions of CO₂
- ▶ contributing to better health, through reducing the risk of death, injury or illness related to transport
- ▶ improving quality of life
- ▶ promoting greater equality of transport opportunity for citizens

Information management is the overarching component linking all five objectives together and the group will seek to highlight and promote ICT in its role as a crucial enable of the Department's overall strategy.

Chair
