## Identity Management Group

The building blocks of the information age

### Charter

## About Intellect

Intellect's mission is to use our expertise and knowledge to provide the highest quality of services and intelligence to our members in the ICT industry, helping them to make the right business decisions to deliver commercial solutions and achieve growth and profitability.

We do this by fostering improved business performance, encouraging thought leadership, and making the shaping of markets and influencing of policy possible. We are constantly striving to provide work environments where our members can meet their potential and thrive in an atmosphere of excellence through working closely with the government, regulatory bodies, policy makers and businesses.

## Background

In the identity management space both private and public sector organisations have always needed to invest in identity assurance processes and procedures. However, identity management today is widely recognised as a critical enabler of the transformational government agenda and service delivery.

The Identity Management Group's activities range from engaging with government on standards and the rollout of the National Identity Scheme to a consideration of broader issues, such as interoperability, security and governance.

## Who are we?

The Identity Management Group comprises over 120 member companies from across the identity management sector. By promoting greater knowledge and understanding of the identity arena, the group aims to highlight identity management opportunities and markets for members, and inform customers on the principles and best practice associated with such projects. [www.intellectuk.org/idmanagement](http://www.intellectuk.org/idmanagement)

### Chair

Andrew Henderson, Giesecke & Devrient

### Vice chair

Bob Conway, Logica

## What we do

The objectives of the Identity Management Group are delivered through a number of activities:

- ▶ speaker-led meetings and workshops focusing on issues such as standards, security and integrity, the National Identity Scheme, interoperability and the European dimension
- ▶ written responses to relevant government consultations, reviews and other initiatives in the identity management space
- ▶ production of white papers and other policy documents conveying industry's position on the subject

## Our aims and objectives

- ▶ Provide a channel for government and other stakeholders to exchange views with industry on technology issues as they arise and draw on private sector experience in shaping future policy and projects.
- ▶ Provide expertise to comment on the technology-related issues and where necessary correct examples of misinformation and misconception about identity systems whether in government, among other stakeholders or in the press and media.
- ▶ Maintain a healthy level of informed awareness about developments in this sector and their applicability to new projects through dialogue and debate with a range of leading speakers from government and industry.
- ▶ Consider the imperatives of recent data handling reviews and how these relate to the design and delivery of identity management solutions.
- ▶ Build identity management development policy and planning, and assist member companies – particularly small and medium sized enterprises – in their relationships with government.
- ▶ Encourage networking and collaboration between members for their mutual interest and benefit.
- ▶ Influence the development of identity management market so that it is profitable and encourages a strong and informed supplier base.
- ▶ Develop practical business guidance to assist customers and suppliers to better understand the identity management procurement environment.
- ▶ Ensure that policymaking is informed by a good understanding of technology.

## Recent speakers

As part of the programme to meet the objectives stated above, the group regularly holds speaker-led meetings with senior-executive stakeholders. Recent speakers have included:

- ▶ **Meg Hillier MP**, Parliamentary Under-Secretary of State, Home Office
- ▶ **Tony Mercer**, Director, Identity Management, UK Border Agency
- ▶ **Lieutenant General Sir Edmund Burton**
- ▶ **Michael Wills MP**, Minister of State for Constitutional Renewal, Ministry of Justice
- ▶ **Dr Duncan Hine**, Executive Director – Integrity and Security, Identity and Passport Service
- ▶ **Dr K. Aniyam C. Varghese**, eGovernment & CIP Operations Unit, European Commission
- ▶ **Frank Leyman**, Manager International Relations, Fedict – Federal Public Service ICT, Belgium
