Managed Print Group

Bringing together members with an interest in the managed print field

Charter

About Intellect

Intellect's mission is to use our expertise and knowledge to provide the highest quality of service and intelligence to our members in the information and communications technologies (ICT), electronics manufacturing and design, and consumer electronics (CE) sectors, including defence and space-related IT industries, helping them to make the right business decisions to deliver commercial solutions and achieve growth and profitability.

We do this by fostering improved business performance, encouraging thought leadership, and making the shaping of markets and influencing of policy possible.

Purpose

The group aims to bring together members with an interest in the managed print field in order to improve the customer communities' understanding of the capabilities of current managed print solutions, with a view to opening up the market and creating opportunities for providers of managed print.

www.intellectuk.org/managedprint

The target audience for this group will include members, customers, and other industry bodies.

The group will achieve its aims via the following means:

- ▶ promoting the managed print services industry to key stakeholders
- ▶ improving the knowledge and understanding of managed print throughout industry, government, and in a variety of vertical markets
- ▶ working with Intellect to produce appropriate guidance and information both for the managed print industry and for wider industry
- ▶ lobbying appropriate stakeholders on issues affecting standards relating to managed print
- ▶ engaging fully with Intellect members active in this area
- ▶ working where appropriate with other Intellect special interest and working groups

Membership

The membership of this group is open to all interested Intellect member companies. The group is committed to fully understanding the varied requirements of its broad membership.

Governance

In accordance with all other Intellect groups, the Managed Print Group will have a Chair, at least one Vice-Chair and Management Committee. Nominations for each position will be sought from the Intellect membership and, where necessary, elections will be held. All positions – chair and vice-chairs – will be for one year, with re-election possible.

Intellect's Transformational Business Delivery Team will provide secretariat support to the group. The Chair, Vice-Chairs and Management Committee will be expected to meet at least four times a year, with group meetings being held as appropriate.

Activities

The group is committed to producing a series of high-quality publications to help Intellect's members – and their clients – improve their awareness of managed print issues and better understand the solutions available to them. The group published its first paper in February 2009: 'Managed Print Services: A Business Tool for the Information Age'. The paper outlines how managed print in the office environment can help organisations understand how much they are spending on print and contain this expanding hidden cost, while improving their carbon footprint, efficiency and security measures. www.intellectuk.org/managedprint

The group is currently working on a series of additional complementary white papers, focusing on a number of topics including procurement and governance issues, environmental issues, and security and compliance.

The group also provides an advisory role to Intellect's staff who are involved in policy shaping or press commentary on issues related to the provision of managed print services.
