SECURITY & PRIVACY GROUP CHARTER

Intellect is the UK trade association for the IT, telecoms and electronics industries. Our members account for over 80% of these markets and include blue-chip multinationals as well as early stage technology companies. These industries together generate around 10% of UK GDP and 15% of UK trade.

We help our members to:

- influence policy
- improve markets
- enhance business performance

The sheer size and diversity of our membership means Intellect is the most influential representative body in many of the vertical markets in which our members operate. Working with members to understand their business objectives, we identify opportunities where Intellect's intervention can create new and better business for all member companies.

Intellect is acknowledged by its members as a primary source of qualitative insight into new market opportunities and emerging supply chains. Being a member of Intellect provides the opportunity to influence decision makers within UK government and industry.

► Introduction

Over recent years, security and privacy have become greater priorities for individuals and organisations around the globe and are likely to remain of crucial importance for the foreseeable future.

Information security is a business issue; it is not simply a technological concern. The majority of organisations want to protect information for sound business purposes - corporate knowledge and data are arguably the most important assets of any organisation. However, in the current political climate, security and privacy issues are highly controversial, generating concerns that governments and corporate entities are eroding civil liberties.

The UK IT industry is increasingly aware of the threats that external sources pose and is responding by developing and implementing solutions that counter these risks. The industry is also at the forefront of developments to protect individuals' personal information and ensure their privacy. The UK is widely regarded as an innovative source of leading-edge technology products and services in this field.

► Who are we?

Intellect's Security & Privacy Group has been established in order to represent the views of IT organisations operating in the security and privacy markets and to better understand these markets.

The target audience for this group includes customers, government officials, parliamentarians, the media and other industry bodies.

► Our objectives are to:

- encourage customers to view security and privacy expenditure as an opportunity to establish competitive advantage
- encourage networking and collaboration between Intellect members
- link with existing organisations in order to provide the suppliers' view on industry-wide issues
- provide a forum for discussion and an opportunity for suppliers to respond to published research
- help members broaden their awareness and understanding of public and private sector security and privacy issues
- develop best practice guidance and standards that address and influence regulation and policy, and encourage uptake of these in the relevant markets
- improve relationships between suppliers and the public sector

► Our activities

Group meetings

Themes for meetings this 2006 will be:

04 May: "Data privacy, sharing and business intelligence"

29 June: "Impact of digital evidence: who, what and when"

28 September: "Security, privacy and outsourcing"

30 November: "Security network transactions"

For more information on these meetings, visit the Intellect website www.intellectuk.org

► Our management committee

The Security & Privacy Group is driven by a management committee comprising of:

Chair : Barbara Navarro, Sapior Ltd

Vice-Chair: Nigel Hopgood, SUN Microsystems Ltd

Vice-Chair: Stuart Morris, Tricerion Ltd

Philip Aiston, Aiston Consulting Limited

Steve Bale, ArmourSoft Ltd

Bill Pepper, CSC

Neil Hilton, Infineon Technologies UK Ltd

John Morrison, Sapphire Technologies Ltd
